COUNSELLING

Interdisciplinary early learning support

In our activities to advance the development of children we focus on the living environment of the child, his/her family and the child care facility. The various forms of care or therapy are designed to support, for example, dexterity, language and social or emotional skills. The early learning support usually takes place in our easily accessible premises: in Freiburg Stühlinger (main office), in Littenweiler, in the city center, in Rieselfeld, in Zähringen, Bad Krozingen and Titisee-Neustadt.

- Development support for children with special needs
- Therapeutic play for children with special needs
- Speech therapy
- Parent and child support sessions
- Coordinated and linked therapies

Language training in child care centres

Supported by the department for labor and social affairs, family, women and elderly citizens (Ministerium für Soziales und Integration) with funds from the German state Baden Württemberg

Counselling

For parents

- Assistance with all questions regarding the development of your child
- Parent-child counselling
- Courses for parents
- Accompaniment in crises
- Support with submitting applications

For education professionals

- Observation of the behaviour and interaction of the child in the everyday activities of the school or child care centre
- Discussion of individual cases
- Further education and lectures
- Supervision
- Coordinated dialogue with specialists, doctors, institutions, etc.
